

Walther Parson holds an associate professorship at the Institute of Legal Medicine, Innsbruck, Austria and an adjunct professorship at PennState, PA, USA. He set up the Austrian National DNA Database Lab in the late Nineties and is currently overseeing the High Through-put DNA Database Laboratory and Forensic Molecular Biology Research in Innsbruck. He received international scientific prizes and serves on various international boards (EDNAP, ENFSI, EAFS, ICMP). He is the current president of the International Society for Forensic Genetics (ISFG). WP leads an active group of researchers and has authored more than 300 peer-reviewed original articles. He is curating the forensically relevant databases EMPOP ([www.empop.online](http://www.empop.online)) and STRidER ([www.strider.online](http://www.strider.online)). He was repeatedly consigned to handle international requests on DNA fingerprinting of historic persons (Russian Tsar family, Mozart, Schiller) and mass fatalities (Chile, Mexico). His current research is focussing on Massively Parallel Sequencing techniques.
